

# PortalsXpress

PortalsXpress adds a secure login to your website. This portal allows you to securely share sensitive documents with anyone with an internet connection!

Whether you need to securely transfer confidential files online or provide fully-automated web-based services to clients, PortalsXpress makes it easy to organize and manage private portals.

Yes, it's secure. Each portal is protected by up to 256-bit SSL encryption, the same encryption protection used by online banking sites.

Create private websites for secure file sharing, help desk services, secure messaging, and more. Try our portal edition for free and see how easy it is to get started.

## Who Uses PortalsXpress?

Simple. ANYONE who needs to share files securely over the internet. You don't have to be a large firm to enjoy the professional benefits of PortalsXpress.

- Accountants
- Legal firms
- Banks
- Trust Accounting Firms
- Health care professionals
- Financial advisors
- Cooperatives
- Software developers
- Printers
- Construction companies
- Bookkeepers

## What PortalsXpress does

Whether you need to securely transfer confidential files online or provide fully-automated web-based services to clients, PortalsXpress makes it easy to organize and manage private portals.

**Portal Branding:** We'll brand your portal account to include your company banner and colors from your website.

**Portal Manager:** We make it easy to create and manage individual portals for secure file sharing and more.

**File Downloads and Uploads:** Clients can download portal files and view the document in its related application.

**Email Alerts:** PortalsXpress notifies you by email each time the contact downloads or uploads files in their portal. You'll know the file name, when it was accessed, and by whom.

**Print to PDF:** You can print PDF output from any Windows application directly to a client's portal.

**Security Padlocks:** make files read-only, manage secure access by groups, prevent accidental deletion, and more.

**Customization:** If one of our ready-to-use portal solutions doesn't quite fit your needs, we can build a custom portal solution to your requirements.

## What do our customers have to say?

*PortalsXpress is awesome! They've put my company's directors at ease, knowing that the files they access are confidential.*

**Karen C., Utility Cooperative**

*PortalsXpress is a cost-effective, straight forward way of exchanging information with clients in a secure manner.*

**Delia F., Financial Services**

*I love being able to get to my files from anywhere in the world, and grant access to individual customers. PortalsXpress is very easy to use - I can just drag and drop files from my computer.*

**Rick R., Accounting Firm**

*PortalsXpress provides an easy method for my customers to access their private files.*

**Jeff E., Employment Services**

*PortalsXpress has provided us with an excellent service. It is a real pleasure to deal with a company that is responsive to our customization needs. PortalsXpress lets our company operate at a high level of efficiency.*

**Steve S., Trust Services**

*Their portals have been a huge time saver. Easy secure access for clients along with the ability to track all files transferred has been extremely useful. Previously we had a custom built portal which in the end cost us far more in labor to just manage files that were sent and received. Our only regret is that we didn't contact PortalsXpress years ago.*

**Chris W., Healthcare Services**
